Flag Status: Flagged

Hi Michael,

We need another field added to the layer DATABASES_ERP_SITE and subsequently the 4 other layers that are derived from it (ERP_SITE_40A_4, ERP_SITE_40A_44, ERP_SITE_62_330, and ERP_SITE_FORESTRY).
The field is called 'Item Number', but I do not know which tables it comes from, but Yamila will probably know.

Thanks,
Jarret Dennis
